

EJEMPLO 1

PROMPT PARA CLAUDE CODE:

Usa esta skill <https://github.com/Leonxlnx/taste-skill> para diseñar una web de alta gama sobre un estudio de diseño y decoración de espacios exteriores (terrazas, jardines y patios).

La web debe tener:

- Hero header con espacio para un vídeo de fondo (lo añadiré después)
- Secciones con scroll suave y animaciones de entrada
- Diseño minimalista y premium, con mucho espacio en blanco
- Tipografías elegantes y grandes
- Paleta de colores oscura con acentos sutiles
- Totalmente responsive (móvil y escritorio)
- Al menos 4-5 secciones: hero, servicios, galería/portfolio, testimonios y contacto

PROMPT PARA EL GENERADOR DE VÍDEO (ejemplo diseño de terrazas):

Smooth cinematic animation of outdoor terrace furniture appearing and settling into place. Starting from the empty terrace shown, pieces of furniture gently float down from above and slide into their final positions: first the wooden deck platform, then the large corner sofa with cushions, the two armchairs, the coffee table, the side tables, and finally the large cantilever umbrella opens up. Decorative cushions (gray, yellow, blue) land softly on the seats. Small potted plants slide into position along the edges. Movement is smooth, elegant and sequential — each piece settles before the next appears. Camera stays static, same angle throughout. Natural daylight, no text, no logos.

EJEMPLO 2

Nano Banana — Imagen 1 (inicio del vídeo: reloj desmontado)

Professional product photography of a luxury mechanical watch, side view angle. The watch is completely disassembled — all internal components (gears, springs, mainspring, balance wheel, escapement, crown, crystal glass, dial, hands, bezel, case back) are floating vertically above the watch case, separated and stacked upward like an exploded engineering diagram. Each piece is clearly visible and perfectly lit. Side perspective showing the vertical stack of components. Pure white background, no shadows, no text, no logos. Ultra high quality, photorealistic, studio lighting with subtle reflections on metal surfaces. The watch should be a classic luxury design with silver/steel casing and dark dial.

Parámetros: aspect_ratio: 16:9, model_tier: pro

Nano Banana — Imagen 2 (final del vídeo: reloj ensamblado)

Professional product photography of a luxury mechanical watch, fully assembled, elegant side angle view slightly tilted to show the dial face. Classic luxury design with polished silver/steel casing, dark black dial, visible hour markers, slim hands, and a refined bezel. The watch is complete, pristine, and perfectly closed. Pure white background, no shadows, no text, no logos. Ultra high quality, photorealistic, studio lighting with subtle reflections on polished metal and crystal glass. Same watch style as a classic luxury timepiece — think Omega or TAG Heuer aesthetic.

Parámetros: aspect_ratio: 16:9, model_tier: pro

Kling 3.0 — Prompt para el vídeo

Usa la **imagen 1** (reloj desmontado) como imagen de inicio:

Smooth cinematic animation of a luxury mechanical watch assembling itself. Starting from the exploded side view with all components floating vertically above the case, each piece — gears, springs, mainspring, balance wheel, escapement, dial, hands, crystal glass, bezel, and case back — gently descends and clicks into place one by one from top to bottom, assembling the complete watch. Movement is smooth, precise, and satisfying, like a Swiss engineering demonstration. Once fully assembled, the camera slowly rotates around the watch to reveal the front dial face in a classic product showcase angle. Pure white background throughout. No text, no

logos. All components must remain within the frame at all times — nothing should spill outside the boundaries.
